want to make the operation of your layout a lot more enjoyable, slow things down and have more hands-on control, the Blue Point™ is what you need! Ideal for yards, sidings and anywhere else you don't need a motor-driven turnout controller. These are small and very easy to install. Blue Point Manual Turnout Controller – PPW/A-Line/Arrow Hobby #11A & B By plucking the switch points like a guitar to check point tension you can get an idea of which way to slide the Blue Point machine. Moving in either direction will put more or less tension on the point rails against the stock (outside) rails. The objective is to have equal pressure against the outside rails. Once you have adjusted a couple of Blue Points you will get the hang of it ... Blue Point

through Coastal DCC Making a model railroad manual turnout control is a relatively simple process; all you'll need to create your own control is an afternoon and a steady hand. To help you put together a model railroad manual turnout control for your next layout, modeler Mary Miller walks you through a step-by-step demonstration for building a control from scratch. She introduces each of the materials you'll ... How to Make a Model Railroad Manual Turnout Control The only way to show the position of the points remotely, is to fix a switch to the point which changes a light on the control board. If you do this you might as well use the toggle switches (on-(off)-on) or two push switches. Warning point motors can
