High School: Algebra | Common Core State Standards Initiative Rewrite simple rational expressions in different forms; write $a(x) / b(x)$ in the form $q(x) + r(x) / b(x)$, where $a(x)$, $b(x)$, $q(x)$, and $r(x)$ are polynomials with the degree of $r(x)$ less than the degree of $b(x)$, using inspection, long division, or, for the more complicated examples, a computer algebra system. Standards Initiative If the expression has a radical in the denominator and a rational number in the numerator, then it is necessary to rationalize the fraction. For example: Multiple the denominator to both the numerator and the denominator. Like terms cancel each other out so the final answer is: Video-Lesson Transcript. Let's go over how to divide radical ... Learn How To Divide Radical Expressions | Video Lesson ... 2. Rewrite expressions using radical and rational exponents using the properties of exponents. In the previous standard, we established some rules about fractional exponents. Here's the gist of those rules: We're allowed to have exponents that are fractions. It's really okay. The denominator of the fraction is the root. Common Core Standards : CCSS.Math.Content.HSN-RN.A.2 Students will become fluent in operating with rational and radical expressions and use the structure to model contextual situations. In this unit, students will also revisit the concept of an extraneous solution, first introduced in Unit 1, through the solution of radical and rational equations. ... Common Core Standards.
