ENVIRONMENTALPROBLEMS - Mind Map In computer graphics, environment mapping, or reflection mapping, is an efficient image-based lighting technique for approximating the appearance of a reflective surface by means of a precomputed texture. The texture is used to store the image of the distant environment surrounding the rendered object. Several ways of storing the surrounding environment have been employed. The first technique was sphere mapping, in which a single texture contains the image of the surroundings as reflected on a sphere. Reflection mapping - Wikipedia The Flood Map for Planning has been moved to a new site, to provide better information for planning applications within areas of flood risk. Go to the new Flood Map for Planning The Flood Map for Planning data is available to download
